

The stigma associated with viral hepatitis can have far-reaching consequences.

To better understand the issues, the World Hepatitis Alliance (WHA) surveyed civil society organisations on their experiences of stigma and discrimination.

The full report, 'Holding Governments Accountable: WHA Civil Society Survey Global Findings Report' can be accessed www.worldhepatitisalliance.org

Stigma reported in **every region of the world**

Governments aren't doing enough

of civil society organisations do not feel their government is satisfactorily addressing stigma and discrimination

of civil society organisations had not been asked for specific advice on stigma and discrimination policies
